Subject: South Puget Sound Dissolved Oxygen Study

Good afternoon —

Back in February, Ecology and EPA met to discuss the South Puget Sound Dissolved Oxygen Study. There were a half-dozen follow-up items from the meetings that needed our attention. While we haven't finalized everything, we are at a point where it makes sense to share what we have. In the attachment we have information on Fort Lewis, Chambers Creek WWTP, pertinent water quality standards, and long-term facility planning for WWTPs in the region. Many thanks to Dave Ragsdale and others who provided input for this document.

Let me know if you have feedback, suggestions, or questions.
